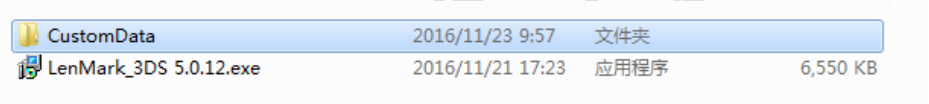
FEELTEK 菲镭泰克	Document Name	Version
APPROVED	Customized OEM Instruction	2017.1.0

1.Modification Content

Open software installation package, there is a folder named “Customdata”, You can put the files that need to be modified in this folder, and the interface is shown in Pic 1 :



Pic 1

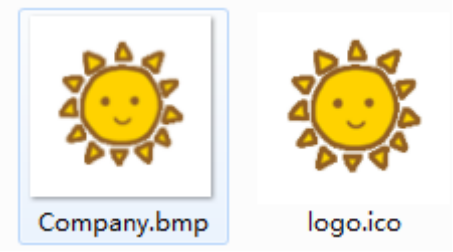
Modifiable content:
1)Software logo, desktop icon, software interface icon
2) Software ‘About us’ icon
3) Background picture when open the software
4) language file
5) Content of “About us”

2.Modification Step

2.1 Logo modification

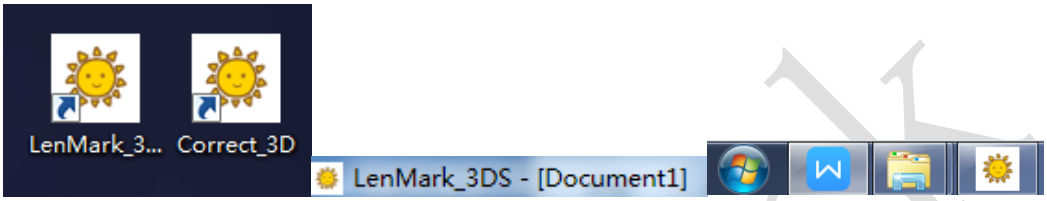
Create a “logo” folder in “Customdata” folder, put a picture called "logo.ico" and "Company.bmp" in the folder, as shown in the pic2:

Lenmark



Pic 2

After the software installation is finished, the contents of the "CustomData" folder will be read automatically, the modified software interface is shown in pic3:



desktop shortcut icon software main interface icon PC taskbar icon

Pic 3

Note

1.The above operation should be done before the software is installed

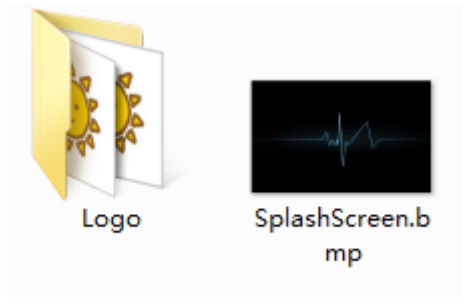
2.The updated desktop icon will shown up after computer restart.

Open “Help-About us” can find the icon change, the interface is shown in pic4

Pic 4

2.2 Software background picture modification

Put a pic called “SplashScreen.bmp” to “CustomData” folder, as shown in pic 5



Pic 5

After installation, it will pop out background picture when double click software, then get into the main interface of software, the interface when open software is shown in pic 6

Pic 6

Note:

1.The background picture in 3D software named “Back.bmp”

2.The background picture in 3Ds software named “SplashScreen.bmp”

3.Please do not use incorrect name when creating picture name, otherwise it won’t modify background picture successfully.

2.3 Language file modification

Insert the language file named .lng in the CustomData folder, the software will automatically read the language during installation, install it to the directory, it can be used in the "Settings - language" selection.

2.4 “About us” content modification

Find the "AboutUS.ini" configuration file in the software installation directory, the parameter instruction in this folder is as below:
Version: software name and version
Company: company name
Tel: company contact
Web: company official website

Modify the above parameter will finish the content modification for “About us”.
After modification, put the folder in “Customdata”, reinstall software, then will see the updated content.

Note: The “version” parameter is only valid in “About us”, the interface will show “LenMark serial” during software installation.
